PREFACE

The thirtieth annual volume of the Industrial Arts Index is a cumulation of the monthly issues published from December, 1941, thru November, 1942. In the list of magazines indexed, the French and German titles have been retained, altho no French periodicals have been received since the beginning of the war, and no German periodicals since June, 1941. It is hoped that the indexing of these periodicals will be included later. Because of the omission of these foreign periodicals eighteen additional American publications were indexed in 1941. This year there have been no additions to the list and few changes. Transit Journal discontinued publication with the December, 1942 number. R C A Review suspended publication with the April, 1942, number. The Journal of the Aeronautical Sciences Review Section is now published as the Aeronautical Engineering Review. American Photography, having absorbed Photo Technique last January, the indexing of that journal was included. In addition to the indexing of the listed periodicals, this volume contains subject entries for numerous bulletins, reports, and pamphlets on topics which the indexed periodicals cover. It contains also subject entries for 2654 books which have been listed first in the monthly Index, in the section "Some Recent Book Titles" before becoming a part of the main alphabet.
